

The Alsa Corporation

The Worlds Most Exotic Finishes

*Candy
Concentrate*®

Frequently Asked Questions

Q. How much do I need to add?

A. The unique thing about Alsa's Candy Concentrates is the fact that you need very little, unlike the recommended 20% ratio of other manufacturers. With Alsa's Candy you need just a few drops per pint or quart so very little will go a long way.

Q. Will Alsa's Candy pool, streak, or bleed?

A. Due to the fact we designed these Candies to go over our chrome products they are extremely clear and crisp. Also these Candies will not bleed through your graphics or into your final clear allowing you to maintain the integrity of your work.

Q. What types of solvents will Alsa's candy work in?

A. Alsa's candy will work equally well in virtually any solvent including but not limited to, lacquers, urethanes, enamels, and acrylics.
